Interior Walls: Locate the walls with openings as shown. This wall will form the upper and lower interior walls. The lower wall will face the opposite way as the upper wall. Glue the walls together as shown or any combination you wish. Add glue strips but leave a gap at the 12 foot cut line as shown. After glue dries cut the walls in two at the 12 foot cut line.

The 12 foot tall exterior wall. This wall is made up from four of the solid walls. Cut lines are provided for optional openings. (**Note:** Be sure you have enough doors and windows) Cut this wall at the 12 foot cut line, glue walls together using the glue strips over the joints. Discard the top portion.
